KABUL, AFGHANISTAN

18 Mar 2012

To Deputy Program Manager IMT, DynCorp International,
Mr Jeff ADMIRE

SUBJECT: Letter of appreciation Mr Antony ACOSTA

As the Director of the Training Section, CJ7, of the ISAF Special Operation Forces Command, I, LTC (BEL OF4) THOELLEN Leslie, would like to thank DynCorp International for the excellent support my section received in order to help ISAF SOF to accomplish their mission.

ISAF SOF Main Effort will remain the comprehensive development of an enduring, self-sustaining MOI Special Police Capability at national level within the General Directorate for Police Special Units (GDPSU), its headquarters and its national and provincial units (PRCs).

ISAF SOF develops an ANSF indigenous training capability in order to enable essential capabilities to endure after transition. Institutionalized training is the cornerstone of this capability; the Special Police Training Centre (SPTC) with its satellite the Special Police Training Wing (SPTW), will institutionalize training of PRCs and National Special Police Units skills and provide broader training opportunities in the form of education and leadership. The courses that will be used at those training centers to teach the Special Police TTP's are being developed by the DynCorp SME's.

Mr Antony ACOSTA has an exceptional high level of professional skills required for the job. He contributed to the development of the PRC Basic and Advanced courses programs of instruction and is the SME for the Investigation and Surveillance unit. His background made him the ideal SME for the Rule of Law and Sight Sensitive Exploitation courses. Tony was also responsible for all logistical issues of the team. Tony is a very reliable person, consistently calm and always to the point. This, combined with his sense of humor, makes him a successful team worker.

It was a pleasure to have Tony in the team, not only for his great professional capabilities but next to that he also became a good friend. Conduct operations with team members such as Tony guarantees a successful mission.

THOELLEN Leslie
LTC (BEL)
ISAF SOF CJ7
